

## World Antimicrobial Awareness Week (WAAW) Campaign for Africa

Global theme: 'Preventing antimicrobial resistance together'.

**18 to 24 November 2022**

### Background

Antimicrobial agents<sup>1</sup>, including antibiotics, have saved millions of lives by substantially reducing the burden of diseases in people, animals, and plants and hence improving quality of life, contributing to better food security and safety, and aiding to increased life expectancy.

However, the emergence and spread of antimicrobial resistance (AMR) in several microorganisms is reversing these benefits and further complicating the management of many infectious diseases. AMR is a major threat to human development and the fight against infectious diseases. It also endangers animal health and welfare and food production as well as affect the health and productivity of ecosystems. While human and animal health dimensions of the AMR crisis have received considerable attention, the environmental dimension is not yet at par. In the recently concluded United Nations Environment Assembly (UNEA 5), AMR was featured in the resolution on Biodiversity and Health which highlighted the spread of antimicrobial resistance in the environment is increased by pollution from human activities and affecting both human and animal health. This further emphasizes the need to address the challenges posed by AMR using a One-Health approach. The global theme for the 4<sup>th</sup> World Antimicrobial Awareness Week (WAAW4) "Preventing antimicrobial resistance together" is therefore in keeping with the objective of addressing AMR in a coordinated, multi-stakeholder, multidisciplinary and inclusive manner.

The factors driving the emergence of AMR are complex and multifactorial therefore requiring the use of a multidisciplinary approach to address them. Accordingly, AMR requires a collective and practical response. To mitigate AMR risks with a holistic approach, the Food and Agriculture Organization of the United Nations (FAO), World Organization for Animal Health (OIE), and World Health Organization (WHO) and the United Nations Environment Programme (UNEP) and Africa Union Task Force on AMR are working closely together at all levels to achieve this.

The One-Health approach is the holistic approach that aims to sustainably balance and optimize the health of people, animals, ecosystems, and the wider environment. It mobilizes multiple sectors, disciplines, and communities to work together to foster well-being and tackle threats to health and ecosystems. Taking a 'One Health' approach has many benefits, such as

---

<sup>1</sup> Natural or synthetic substances that kill or inhibit the growth of microorganisms such as bacteria, fungi and algae

complementarity for amplified impact, cost savings incurred by addressing multiple threats simultaneously etc.

Under the auspices of the Africa quadripartite members (FAO, OIE, WHO, UNEP), and Africa Union ((Africa Centre for Disease Control and Prevention (Africa CDC), and the African Union Inter-African Bureau for Animal Resources (AU-IBAR)), the 4<sup>th</sup> continental joint WAAW Africa campaign will be celebrated from 18 to 24 November 2022 on the theme **“Preventing Antimicrobial Resistance Together in Africa”**

### Overview of the weeks’ activities

The 2022 WAAW Africa campaign will be organized in a hybrid mode with focus on the following topics:

1. Adopting a One Health approach and multi-sectoral coordination mechanisms for AMR prevention and mitigation
2. Optimizing AMR Implementation: Successful Initiatives on AMR control
3. Understanding the environmental dimensions of AMR
4. AMR in aquaculture a concern for food safety, the environment and aquatic animal health
5. Becoming AMR advocates: Why voices of young Africans are needed

HIGH LEVEL EVENT: MONDAY 21 NOVEMBER 2022			
Time (GMT)	Agenda Items	Responsible Agency	Moderator
	Statements and Opening Remarks		
09:30 – 09:40	H.E. Josefa Leonel Correia Sacko, Commissioner for Agriculture, Rural Development, Blue Economy and Sustainable Environment, African Union Commission	AU	AU
	Ministers of the Host Government		
09:40 – 09:50	Hon. Minister for Health and Social Action, Senegal, Dr Marie Khemesse Ngom Ndiaye		
09:50 – 10:00	Hon. Minister for Livestock and Animal Production, Mr. Aly Saleh Diop		
10:00 – 10:10	Hon Minister for Environment and Sustainable Development, Mr. Alioune Ndoye		

10:10 – 10:30	<p>Keynote Address: <i>Preventing Antimicrobial Resistance Together in Africa</i></p> <p>Prof C.O. Onyebuchi Chukwu</p> <p>Dr Aminata MBENGUE NDIAYE</p>	UNEP	UNEP
10:30 – 11:10	<p>Panel Discussions</p> <ul style="list-style-type: none"> <li>• Dr. Abebe Haile-Gabriel, Assistant Director General &amp; Regional Representative for Africa, FAO</li> <li>• Dr. Ahmed Ogwel Oum, Ag Director, Africa CDC</li> <li>• Mr. AbdulHakim Elwaer Assistant Director-General and Regional Representative for the Near East and North Africa, FAO</li> <li>• Dr. Matshidiso Moeti, Regional Director for Africa, WHO</li> <li>• Mr. Frank Turyatunga, Director and Regional Representative for Africa, UNEP</li> <li>• Dr. Nick Nwankpa, Ag Director AU-IBAR</li> <li>• Dr. Ahmed Al-Mandhari, Regional Director for the Eastern Mediterranean, WHO</li> </ul>		
11:10 – 11:35	Launch of 2022 WAAW Communiqué		
11:35 – 11:40	Overview of activities to commemorate the 2022 WAAW Campaign in Africa	FAO	
11:40 – 12:10	<p>High-level press briefing</p> <ul style="list-style-type: none"> <li>• Commissioner, AUC</li> <li>• Ministers</li> <li>• Regional Directors</li> </ul>		
	<b>MEDIA ROUNDS</b>
