

## 1<sup>ST</sup> AFRICA CENTRES FOR DISEASE CONTROL AND PREVENTION (AFRICA CDC) YOUTH PRE-CONFERENCE

UNDER THE THEME “MEANINGFUL YOUTH ENGAGEMENT FOR ADVANCING  
SUSTAINABLE HEALTH SECURITY IN AFRICA”  
10-11 DECEMBER 2022

A side event at the margins of the 2<sup>nd</sup> International Conference on Public Health in Africa  
(CPHIA 2022)

### OUTCOME STATEMENT

#### BACKGROUND

Africa continues to experience the highest incidence of public health emergencies annually. Therefore, the African Union Heads of State, Governments, and participating Heads of Delegation called for the full implementation of the New Public Health Order for Africa during the sidelines of the 77<sup>th</sup> Session of the United Nations General Assembly. <https://africacdc.org/news-item/africa-calls-for-new-public-health-order/>

African youth constitute over 65% of the African population of more than 1.3 billion people. Behind this number are young health professionals and health advocates who hold great potential to innovate and advance Africa's health. They play a critical role in African countries in promoting public health and reaching communities and thus, are partners, assets and a prerequisite for a sustainable health security in Africa.

It is against this backdrop that Africa CDC convened the inaugural **Youth Pre-Conference on 10 - 11 December 2022 in Kigali, Rwanda, at the margins of CPHIA 2022**. The theme of the pre-conference was “**Meaningful youth engagement for advancing sustainable health security in Africa**”. This ties in well with the African Union (AU) Agenda 2063, Aspiration 1 on Health, getting young people involved in health issues.

This inaugural Youth Pre-Conference was designed to kick-start a long-term strategic engagement between Africa CDC and young people in Africa, to mainstream their role in the advancement of sustainable health security for the continent.

It aims to provide a collaborative, open, and inclusive space for young people to critically reflect on the current state of public health in Africa, share perspectives on their role in public health, and prospects for enhancing meaningful youth engagement in this area.

Participants were drawn from various state and non-state institutions, groups, and networks from national, regional, and continental levels. They included young people with backgrounds and experiences in medical science, public health, health policy, and health technology as well as representatives from youth-led and youth-oriented organizations, networks, associations, and academia.

## **RECOMMENDATIONS**

Based on the fruitful discussions and valuable insights during the Youth Pre-Conference, the following actions for a meaningful engagement of young people are recommended to advance sustainable health security in Africa:

### **I. Inclusive youth engagement in the public health discourse**

- Institutionalize adequate representation of African Youth in the discourses on public health at national, regional, continental and global levels.
- Develop a strategy for a meaningful and inclusive youth engagement to advance Africa CDC's vision of a New Public Health Order.

### **II. Youth mainstreaming in decision-making and accountability**

- Ensure better youth mainstreaming in decision-making within Africa CDC on health-related issues in Africa through the establishment of a formal structure for youth engagement to be embedded within Africa CDC.
- Establish structures that engage young people on the progress made towards the implementation of health strategies and policies at the national, regional and continental level.

### **III. Facilitate a collaborative public health network on the continent**

- Provide a platform for peer-to-peer dialogue and intergenerational discussion to enhance exchange and to scale up best practices across the continent.
- Harness the creativity of youth in the development of youth friendly information content and platforms for engagement on public health and the New Public Health Order.

#### **IV. Capacity building of emerging public health leaders**

- Promote the recruitment of African youth with specialized skills through capacity building and training as well as the establishment of a continental *Young Professionals in Public Health Program* within the Africa CDC.
- Provide scholarships, bursaries, and sponsorships for educational and practical trainings to aid emerging public health leaders.
- Provide emerging public health leaders on the continent with necessary skills and capabilities for public health policy and research, technology and innovation as well as health economics through mentorships.

#### **About The Africa CDC Youth Pre Conference 2022**

The Africa CDC convened a Youth Pre-Conference on 10 - 11 December 2022 in Kigali, Rwanda prior to its 2<sup>nd</sup> annual International Conference on Public Health in Africa (CPHIA) 2022. The aim is to kick-start a long-term strategic engagement between Africa CDC and young people, to advance the full implementation of the New Public Health Order (NPHO) and thereby, drive health security in Africa and globally. The Youth Pre-Conference 2022 took place in-person with live streaming and participants were invited to participate at the CPHIA 2022 (13-15 December 2022) to engage in the conversation on the theme: Meaningful youth engagement for advancing sustainable health security in Africa.

#### **About CPHIA 2022**

CPHIA 2022 provided a unique platform for African researchers, policymakers and stakeholders to come together and share perspectives and research findings in public health while ushering in a new era of strengthened scientific collaboration and innovation across the continent. Building on [CPHIA 2021](#), CPHIA2022 also served as a catalyst to build more resilient health systems that allow African countries to better prepare for and manage emerging health threats while also addressing long-standing infectious diseases.

Done in Kigali, 11 December 2022.
